POST-CONSUMER  
TERRAZZO

---

Research has always been  
a fundamental part  
of our identity.  
Since the company  
was founded 25 years ago,  
we have been investing  
in the development  
of new products  
and the refinement  
of our processes.

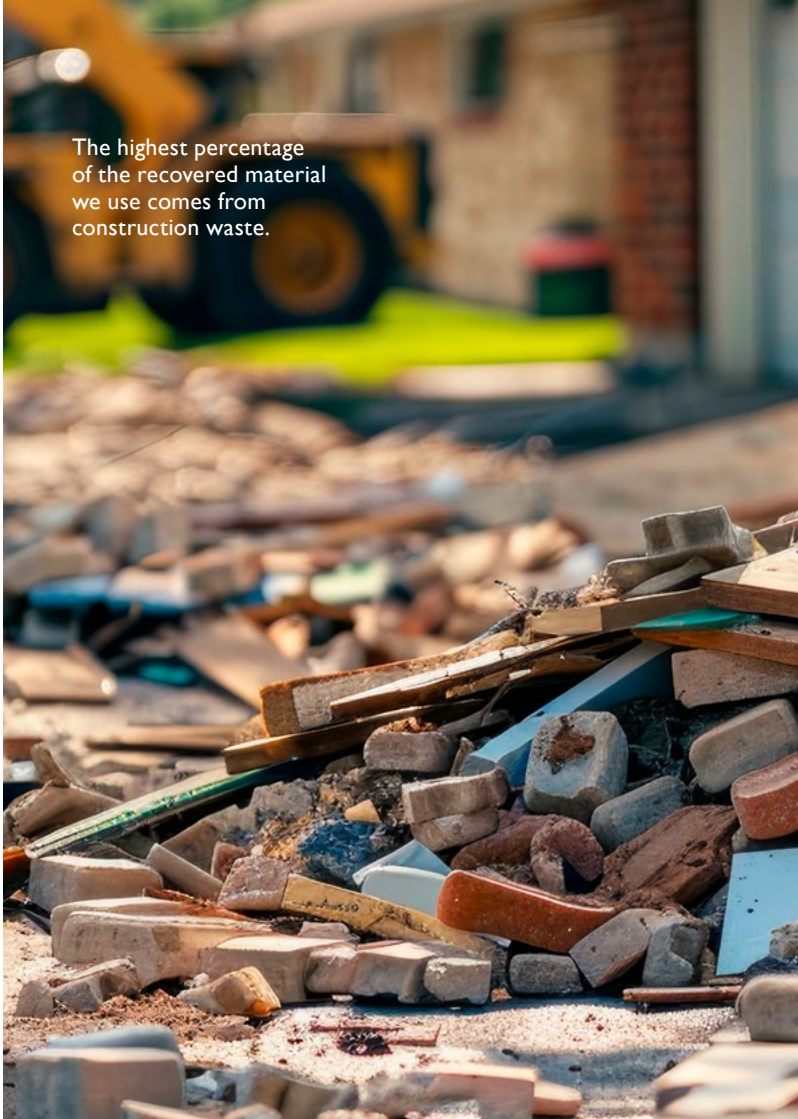

## Giano: the two faces of innovation

GIANO represents  
a new generation of tiles  
made from materials recovered  
from the demolition of residential  
buildings and large-scale structures.  
Like the ancient Roman god  
from which it takes its name,  
GIANO looks simultaneously  
to the past and the future,  
giving new life to materials that  
would otherwise be discarded.

## “Everything depends on the beginning” (Ovidio)

In a time of transition, our company is at the forefront of rethinking the traditional production cycle, moving beyond the linear model to embrace a circular and sustainable approach. Each GIANO tile is created by optimizing existing materials, extending their lifecycle, and minimizing waste. Once they have fulfilled their function, our tiles can be reintroduced into the production cycle, giving rise to new construction solutions and generating continuous value.

The highest percentage  
of the recovered material  
we use comes from  
construction waste.

## Beyond the threshold of the future

Like the two-faced Janus, our vision extends beyond the present. We look at existing resources with the awareness that innovation and environmental responsibility must go hand in hand to build a future where nothing is wasted, but everything is transformed.

GIANO is not just a tile. It is a bridge between past and future, the beginning of a new challenge.

## DECLARATION OF PERFORMANCE

The original materials undergo rigorous testing to ensure high standards of quality and safety.

UNIQUE IDENTIFICATION CODE OF THE PRODUCT TYPE	CRUSHED 25/50 CLS Code 6
INTENDED USES	Aggregates for unbound and bound materials with hydraulic binders for use in civil engineering works and road construction. Compliant with tables C4 - C5 of C.M. 5205/205.
CRUSHING	Crushed material

## INTERPRETATION OF THE LIFE CYCLE

GLOBAL WARMING POTENTIAL - TOTAL (GWP-total)	Certification in progress

It is possible to achieve customized color solutions while keeping the composition of the aggregate unchanged and modifying the color of the base mix. This great versatility gives each project a distinctive imprint.

GIANO tiles transform without losing their essence.
